

## 5 ROBUST MANAGEMENT OF NATURAL RESOURCES

Common standards should be set up and enforced to deliver clean air and water, safe and healthy food and to protect our oceans. Ambitious measures must be implemented to stop deforestation and biodiversity loss in Europe and globally.

Reform of the Common Agricultural Policy is imperative to produce healthier food and give fair prices for the European small scale and organic farmers. This should mean more environmental and nature protection, less food waste and the halting of dumping in the Global South.

## 6 SUSTAINABLE AND HEALTHY FOOD SYSTEMS

Effective and coordinated taxation measures should ensure that all companies pay their fair share of taxes and contribute to national and European public budgets. The EU must commit to effectively fight tax evasion worldwide and shut down European tax havens.

## 7 FAIR TAXATION

International trade should be seen as a means to the efficient distribution of goods and services, respecting social and environmental objectives. Trade agreements should benefit people, workers and small producers and cannot be seen as tools solely in the interest of multinational companies and investors.

## 8 FAIRTRADE AGENDA
